Profile

I am a B.Tech Computer Science student passionate about Full Stack Development, modern web technologies, and building scalable, user-friendly applications.

Professional Summary

I am a passionate Computer Science Engineering student and aspiring Software Engineer with a strong interest in Full Stack Development, modern web technologies, and software architecture. I enjoy transforming ideas into scalable, secure, high-performance, and user-centric digital products that solve real-world problems. My primary focus is on building responsive, accessible, and maintainable applications while following clean coding principles, industry best practices, and modern development standards. I continuously explore new technologies, frameworks, and tools to strengthen my technical expertise and stay aligned with the rapidly evolving software industry. I believe great software is built through curiosity, consistency, problem-solving, attention to detail, and a commitment to writing clean, reusable, and efficient code. Beyond development, I enjoy learning emerging technologies, building meaningful projects, collaborating with talented people, and continuously challenging myself to become a better engineer. My long-term vision is to create impactful software solutions, contribute to innovative products, and build technology that delivers real value to individuals, businesses, and communities worldwide.

Technical Skills

Frontend

React Next.js TypeScript Tailwind CSS Framer Motion HTML & CSS

Backend

Node.js Express.js REST APIs MongoDB PostgreSQL Firebase

Tools & DevOps

Git & GitHub Vercel Docker Figma VS Code Linux

Languages
